

WHAT IS A MEDICAL HERO?

MEDICAL HEROES
HELP ADVANCE
PUBLIC HEALTH
AND MEDICAL
KNOWLEDGE BY
PARTICIPATING IN
CLINICAL TRIALS

OUR PATIENTS ARE MEDICAL HEROES

We are making it easy for you by providing questions for you to ask yourself, your physician, and the clinic before beginning a clinical trial. While our Medical Heroes help make scientific advancements for everyone, they also receive valuable help and information in return.

UNDERSTAND YOUR CONTRIBUTION

- How will this trial help others?
- What results have come from this study?
- How many patients enroll in your trials a 2nd time?

HOW PARTICIPATING BENEFITS YOU

- What kind of treatment will I be given?
- Will participating help me with my condition?
- Will I be a guinea pig?
- How much blood work is involved?
- Will I receive a placebo?
- Will it interfere with my current medications?
- What happens if I get hurt or sick?

PREPARING FOR YOUR VISIT

- What is expected of me as a research participant?
- What can I expect when I visit the research site?
- What forms do I need to fill out before we begin?
- Will it cost me anything to participate?
- How much will I earn for participating?
- Do I need medical insurance to participate?

UNDERSTANDING THE BASICS

- What are the qualifications of physicians and staff?
- How much time will my research trial take?
- Can I continue to see my own doctor?
- Will my doctor be upset if I am participating in a trial?

PLANNING FOR POST-CARE

- Who will provide medical care for me after the study?
- If the treatment works, can I keep using it after the study is over?
- Will I receive follow-up care after the study is finished?
